
Beautiful Plains School Division Accessibility Plan 2023/24

-Update November 2023

Accessibility Achievements

Beautiful Plains School Division is committed to creating a safe and inclusive environment. The policies that currently promote accessibility include: mission statement, school division goals and objectives, respect for human diversity and equity, belief statements, transportation, workplace health and safety and school programs/instruction-student services. We communicate regularly with families with special needs in our communities and consult for ongoing ways to improve accessibility. The division engages in consultation with individuals disabled by barriers that support them when planning the updates to the accessibility plan. This is accomplished by holding meetings with families that experience accessibility barriers. We completed several ongoing projects to improve accessibility including the addition of an elevator in our largest high school which was requested for a number of years and grooming room renovations in all of our large schools. The design of our new school completed in 2020 was in compliance with MB building code and regulations for accessibility. We purchased a wheelchair accessible bus in 2022. Our accessibility committee added accessible parking spots with improved signage, and we increased communication about reasonable accommodations for employees through a new resource provided through MB Accessibility Office. We have also add an accessible door to a high school back entry and universal bathrooms in both high schools. Assistive technology for students and staff are ongoing purchases that are used to advance student learning and assist individual needs of students or staff.

In addition to these projects, over the past two years, we have provided, and made readily available, appropriate Personal Protection Equipment (PPE) to all staff and students due to Covid-19, along with specialized PPE to identified vulnerable staff or students at risk of exposure and/or transmission of Covid-19. We have a policy that allows for service animals on all of our premises. We also have ongoing processes and procedures for maintaining existing accessibility features including, elevators and power doors so that they are used as intended. We have provided on-going support to individual requests of accommodations. We also provide access to technology for students and staff to support virtual learning within classrooms and remote learning at home, including mifis and assistive technology specific to each individual's needs.

Barriers to Accessibility

Barriers to accessibility for Beautiful Plains School Division are mainly the result of the cost and time needed for improvements. There are upgrades to our buildings, website, and other spaces that continue to require improvement. Our largest challenge continues to be upgrades aging facilities and buildings to meet accessibility standards where costs are high and completion/design process are lengthy. Barriers such as information and communication, policies which require new software or hardware, systemic improvement and attitudes are examples of possible barriers for long term improvement. These require not only time and financial resources but also human capital.

Statement of Commitment

Beautiful Plains School Division is committed to ensuring educational opportunities, access, and outcomes for all people. We are committed meeting the needs of all people who face accessibility barriers. We will do this by identifying, removing and preventing barriers and by adhering to the requirements of *The Accessibility for Manitobans Act* (AMA).

Policies

Beautiful Plains School Division reviews all programs, services and new initiatives to ensure accessibility. We review existing policies attached to these programs and services for possible barriers. Beautiful Plains School Division is committed to providing equitable education to all students and this is reflected in our decision making principles which include

- Ensuring appropriate learning opportunities for all students and employees
- Assessing programs and services effectiveness to help students and staff succeed
- Using data to inform resource allocation
- Advocating for funding, resources and equity rights to support students in at-risk situations and staff who have barriers that impact their work

Actions

Action 1- Accessibility Working Group	
Initiatives/Actions <ul style="list-style-type: none">• Management appointed an accessibility coordinator• Management established an accessibility working group• Meet to review initiatives working toward accessibility	Expected Outcomes <ul style="list-style-type: none">• A working group which consists of representation of the division will meet to review and update plan and policies• Meeting minutes are available to review through accessibility coordinator• Working group has work plans, multi-year timelines• Members participate in developing, implementing, updating the accessibility plan on an annual basis• Ensure that any provisions related to accessible customer service, employment, information and communication supports are consulted on as a committee• Work with supervisors to let employees know that policies and practices are updated and where to locate information with communication supports available upon request
