

Student Accidents – Protect Yourself

Your children will once again be bringing home a Student Accident Insurance pamphlet from school. This insurance provides accident insurance for your children on a twenty-four hour, seven days a week basis so coverage is in effect for non-school activities as well. If your family purchases insurance, your children will be covered for accidents and ambulance services. A single event cost of an ambulance ride or dental repairs due to an accident can be extremely expensive. We encourage you to please review the pamphlet for coverage levels.

As a school division it is extremely important to us that your children are safe when they attend school. The fact is that despite the best efforts of our staff, accidents may occur. The majority of these accidents occur on the elementary playgrounds through the course of normal play. This challenges a common perception that accidents occur primarily as a result of participating in sporting events. When an accident occurs at school, staff will always err on the side of caution by calling an ambulance if there is any doubt as to the seriousness of the injury.

This fall when your child brings the student accident insurance pamphlet home, please give it serious consideration. The cost is surprisingly affordable for proactive peace of mind. You can also review the insurance plan at <http://www.manitobastudentinsurance.ca>
