

EMERGENCY TRANSPORTATION

When any vehicle transporting students in the Division is unable to complete either the pick-up or delivery of students because of a malfunction of the vehicle, the driver in consultation with the Transportation Supervisor shall arrange an alternate means of safe transportation for the students concerned. Private vehicles may be used provided that permission to do so has been given by the Transportation Supervisor or the Secretary-Treasurer. Payment for the use of private vehicles will be at a rate established by the Board for travel on Division business.

If students will experience long delays in arriving at home or at school as a result of the breakdown, the bus garage personnel should inform the Principal(s) of the school(s) concerned of the delay.
