

RENTAL OF COMMUNITY FACILITIES

The Division recognizes the value of having community facilities available for use by the schools.

Therefore, it is the policy of the Division to provide an annual allocation for the rental of community facilities for school day curricular use such as instruction in skating, curling, bowling and swimming. The costs for the use of these facilities for extracurricular programs are to be offset by user fees.

Agreements and rental rates for these facilities shall be established from time to time by negotiation between the Division and the governing bodies of the community facilities.
